(U) Abstract

(U) Center the title Abstract, as shown, in 12-pt Arial (sans serif) bold font above the text of the abstract. Indent the left and right margins of the abstract 1.75 in. from the edge of the page. The text of the UNCLASSIFIED abstract is 10-pt Times (serif) font, left and right justified, and ≤ 500 words; limit the text of the abstract to the first page. **Do not begin the main text on the first page.** Mark the overall classification of the paper on the title page, followed by “This Page Unclassified,” as shown on this page. In a footnote to the title page, include the primary author’s address (optional) (footnote 1), copyright, downgrade (including name of document originator and job title, derivation authority and date, and declassification date), distribution statement, applicable warnings, and destruction notice.² AUS and GBR presenters should follow downgrade statement, export control information, and all other cover page markings in accordance with their government’s guidance. On the left side of the page header, if desired, add the logo or name of the authoring organization followed by the address. In the page footer, fill in the appropriate session number and primary author’s last name. **Each paper is limited to a total of 30 pages including all text, tables, figures, and references.**

¹ Author’s address: Widgets International, 12345 Constitution Ave., Washington, DC 22222; e-mail: Primary.Author@widgets.org. Include addresses of other authors in their biographies, if desired.

CLASSIFICATION

STS 2026, SESSION XX (PRIMARY AUTHOR’S SURNAME)

1 (U) FIRST-LEVEL HEADING: ALL CAPITALS BOLD

(U) Begin the main text on the second page of the document (12-pt serif type). The first page contains the unclassified title, authors, and abstract only. Keep all content on the first page UNCLASSIFIED. Indent paragraphs 0.75 in. Include classifications of all headings and titles before the heading or title. The Styles menu contains a set of paragraph styles with the prefix “STS” [e.g., STS (U) Body, STS Body Text (no classification)]; text styles (for use in applying *italics*, **bold**, etc.) begin with the “STS” prefix. Note that heading styles do not have the STS prefix and do not contain classifications; add heading classifications manually before the title on all heading levels. The STS2026 Speakers’ Kit contains details on format specifications for *Proceedings* papers.

(U) Adopt a standard set of style rules for grammar, punctuation, and hyphenation such as those in the *Government Printing Office Style Manual*, *Chicago Manual of Style*, or *IEEE Editorial Style Manual* [1–3]. Refer to the National Institute of Standards and Technology (NIST) publications [4 and 5] for standards on units of measure.

1.1 (U) SECOND-LEVEL HEADING: INITIAL CAPITALS, SMALL CAPS BOLD

(U) Use decimal numbering for section headings, which should be unclassified if possible but always require classification markings as shown here. Cite references by numbers in square brackets in text as shown in the preceding paragraph. Include the complete reference citation in the [References](#) section; use a consistent style for reference citations (e.g., as shown in the [References](#) section of this sample paper or *IEEE Editorial Style Manual* [6]).

1.1.1 (U) Third-Level Heading: Initial Capitals Bold

(U) Use consecutive superscript numbers for page footnotes.³ Refer to tables and figures by number in text. Figure 1 provides an example of the figure format. [Table 1](#) provides guidelines on table formatting including fonts, spacing, title style, and placement of classification markings and footnotes to the table.

1.1.1.1 (U) Fourth-Level Heading: Initial Capitals Italics

(U) Fourth- and fifth-level headings are not recommended unless needed to provide information essential to understanding the full scope of the paper.

1.1.1.1.1 (U) Fifth-Level Heading: Initial Capitals 11-pt

(U) Indent numbered and bulleted lists as shown. Classify the paragraph introducing lists with the highest classification of any item in the list. Precede each bullet item with its classification marking, even if all items in the list have the same classification as follows:

- (U) Indent bullets beginning at 0.75 in. Indent subordinate items as shown below. Wrap the text as shown in this example. Add classification marking manually.
 - (U) Use a consistent subordination scheme for items in bullet lists.
 - (U) See Section [1.3](#) for further examples of numbered lists.

³ (U) Provide the classification of each footnote as shown here. Footnotes (except for those on the title page) are 10-pt Times font.

1.2 SAMPLE PARAGRAPH CLASSIFICATION STYLES

Note

The following examples of STS paragraph styles are for illustration only. All content in this Sample Paper is UNCLASSIFIED. STS paragraph styles are precoded with the classification and paragraph indentation tabs.

(U) This paragraph is an example of the UNCLASSIFIED body text style [Style Name: STS (U) Body].

(C) This paragraph is an example of the CONFIDENTIAL body text style [Style Name: STS (C) Body]. This paragraph is for illustration only. All content in this Sample Paper is UNCLASSIFIED.

(S//REL USA, AUS, GBR) This paragraph is an example of SECRET REL USA, AUS, GBR body text [Style Name: STS (S//REL_USA_AUS_GBRLo) Body]. This paragraph is for illustration only. All content in this Sample Paper is UNCLASSIFIED.

(X) This is an example of a plain paragraph style [Style Name: STS Body Text], It does not have a classification or indentation tab, which must be added by the user.

1.3 MARKING CLASSIFICATIONS IN NUMBERED LISTS

(Z) Mark each of the items in a bulleted or numbered list individually (as shown in the following items) if you wish to show that their classification differs from that of the paragraph introducing the list, which has the highest classification of any item in the list [indicated in the following numbered list by (Z)]:

- (1) (U) This is an example of a numbered list with an introductory paragraph of the highest classification and individually classified items of classifications, some of which are different from that of the parent paragraph.
 - a. (X) Subordinate item in a numbered list
 - b. (Y) Another subordinate item with the highest classification in the list
- (2) (Z) This is another item in a numbered list with individually classified items. It is an example of an item with the highest classification in the list, which must be reflected in the parent paragraph introducing this list.

(U) The following page is preceded and followed by a section break to illustrate how to insert a landscape page. [Table 2](#) contains a detailed listing of standard page elements used in this template.
